

# What is Baptist OneCare?

Baptist OneCare® is a fully integrated electronic health record (EHR) provided by Epic. This is one way Baptist Memorial Health Care is advancing patient-centered care.

With approximately 270 customers,

Epic serves more than 51% of the U.S. population and 2% of the world's population.

As of March 2014, Epic had over

# 24 million

MyChart accounts activated nationwide.

## What does this mean for me, a physician?

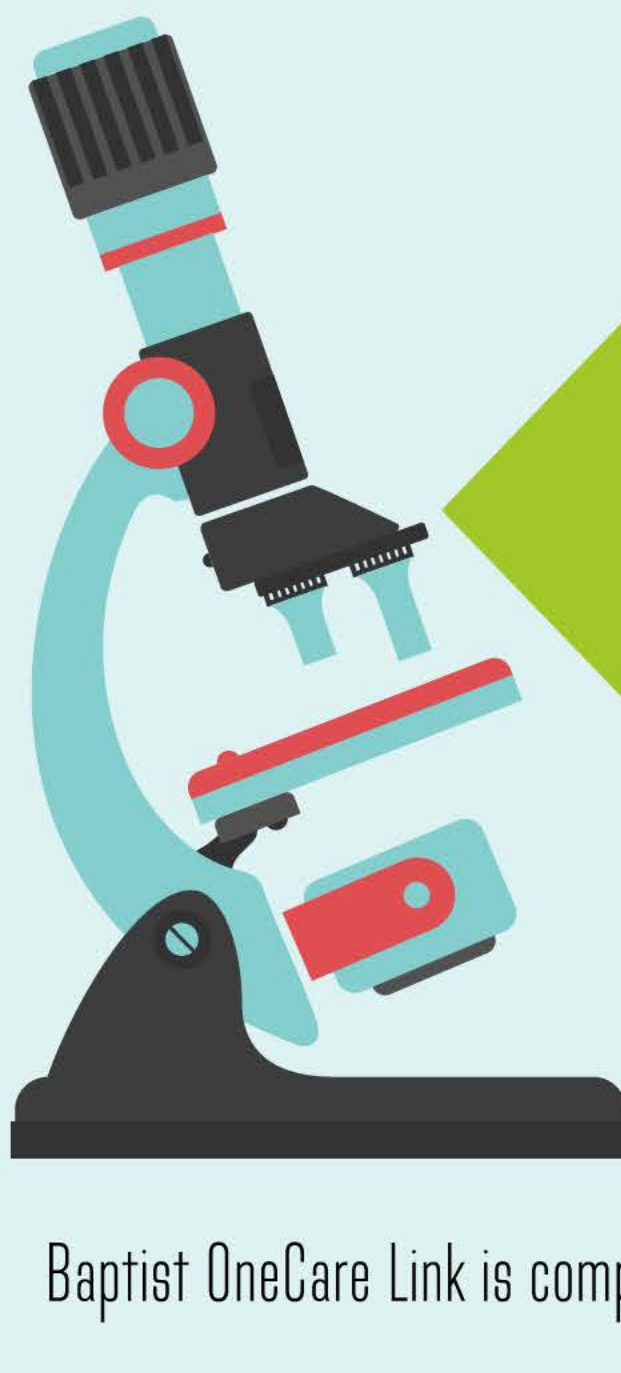

Patient-Centered Care

With a fully integrated EHR, you and your staff can devote more time to personalized care.

Not a Baptist employed physician? We offer **BAPTIST oneCare connect**

**TIP:** Both Baptist OneCare and Baptist OneCare Connect meet meaningful use standards.

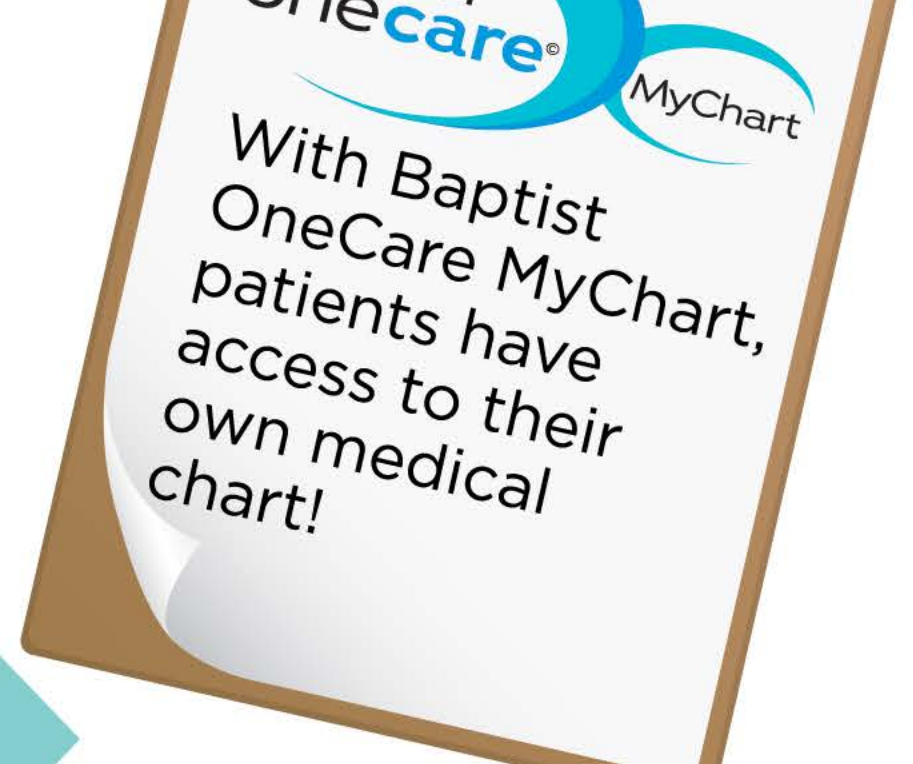

If you refer patients to Baptist for testing or only need access to records for consultation, you'll want **BAPTIST oneCare LINK**

- This program will allow you to:
- Request consultations
  - Schedule appointments
  - Place orders
  - Send messages to providers
  - Stay informed of a patient's care (lab results, admissions, discharges, notes, orders)
  - Use 3rd party billers and payers

Baptist OneCare Link is completely online, there is no software to download!

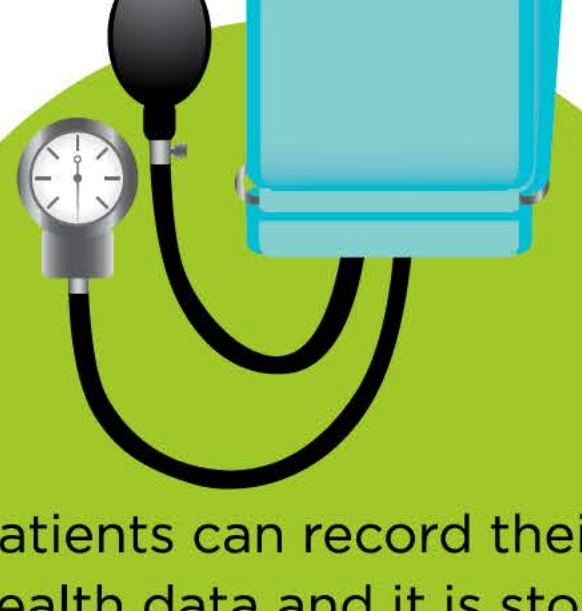

## How will my patients benefit?

For you and your patients, this means saved time!

Physicians won't be flooded with messages - the average MyChart patient sends a message every 4-5 months<sup>4</sup>.

Patients can record their own health data and it is stored in an easy to read flowchart.

Online renewal requests save an average of 4 minutes compared to a phone renewal<sup>1</sup>.

Releasing a result through MyChart rather than a letter saves 2 minutes and 15 seconds of staff time and saves paper and postage<sup>1</sup>.

One clinic noted a 15% decrease in phone calls after patients started using MyChart<sup>2</sup>.

64% of MyChart patients surveyed said they would call the clinic's office if they couldn't use MyChart<sup>3</sup>.

69% of the messages were for clinical symptoms (65% were following up on an existing condition)<sup>5</sup>.

53% involved a medication issue<sup>5</sup>.

24% were regarding labs or imaging tests<sup>5</sup>.

\*No messages during this time were considered frivolous or inappropriate<sup>5</sup>.

A 2007 survey found that 73% of physicians agree that **"MyChart improves patient/physician communication."**

## Can I use my mobile device?

Use the Canto iPad application or the Haiku for iPhone and Android application.
